

PROFESSIONAL SUMMARY

Senior software engineer and AI solutions architect with 15 years delivering production systems across AI, payments, digital identity, and cloud platforms. Leads AI architecture and developer enablement at Strawberry, including an AWS Bedrock and Model Context Protocol platform. Recent work on Sweden's EU Digital Identity Wallet and payment integrations serving 3M+ customers reflects a hands-on approach spanning Java, cloud engineering, architecture, governance, and technical leadership.

TECHNICAL SKILLS

Core Engineering: Java 21, Kotlin, Python, TypeScript, Go; Spring Boot 3, Quarkus, JUnit, Mockito, PostgreSQL

AI Engineering: Model Context Protocol (MCP), Anthropic Claude, AWS Bedrock, LiteLLM, Spring AI, LangChain4j, agentic systems, model evaluation, AI governance

Cloud & Platform: AWS, Kubernetes, Docker, Google Cloud Platform (GCP), OpenShift, Terraform, GitHub Actions, Datadog, CI/CD

Architecture & Security: Microservices, REST APIs, Domain-Driven Design (DDD), OAuth 2.0, OpenID Connect, eIDAS 2.0, GDPR

Spoken Languages: Swedish (native), English (C2)

PROFESSIONAL EXPERIENCE

STRAWBERRY

Principal AI Engineer (via Bytelope AB)

February 2026 – Present

Stockholm

- Lead AI architecture and developer enablement for a 14-developer product team working across Java 21, Spring AI, LangChain4j, Python, TypeScript, and Go.
- Defined AI strategy and governance covering EU data residency, data processing agreements, no-training guarantees, model evaluation, cost controls, and sovereign AI requirements.
- Architected the central LLM platform on AWS Bedrock and EKS with LiteLLM, an MCP gateway, tool federation, and Bedrock Guardrails; scaled adoption from 0 to 34 users.
- Designed and delivered training in Claude Code, prompt engineering, MCP, tool calling, local LLM deployment, model selection, and OWASP LLM red-teaming.

BYTELOPE AB

Founder / Consultant

April 2021 – Present

Stockholm

- Independent consulting practice delivering AI enablement, cloud platform engineering, payments, and digital identity solutions; member of the Anthropic Claude Partner Network.

SWEDISH AGENCY FOR DIGITAL GOVERNMENT (DIGG)

Senior Software Engineer / Scrum Master (via Bytelope AB)

September 2024 – October 2025

Stockholm

- Built Sweden's EU Digital Identity Wallet as a core engineer on a 15-person national team, implementing eIDAS 2.0 and OpenID for Verifiable Credential Issuance and Presentation (OpenID4VCI/VP).
- Led a six-person team delivering a PAdES-compliant Digital Signature Service and onboarded five engineers to the wallet programme.
- Integrated OAuth 2.0, BankID, and the EU reference implementation across Java 21, Kotlin, Quarkus, Vue.js, and PostgreSQL services.

KINDRED GROUP

Senior Software Engineer (via Bytelope AB)

August 2021 – January 2024

Stockholm

- Owned and modernized 10 Java 21/Spring Boot payment integrations for 3M+ active customers under KYC/AML requirements; managed production escalations as rotating Incident Manager.
- Created reusable Spring Security, WebFlux, and JPA/Hibernate templates, libraries, and engineering standards for Kubernetes payment integrations.
- Regularly conducted technical interviews, onboarded nine engineers, and served as team knowledge anchor through a successful team split and Scrum Master transition.

- Led a distributed team of nine building Java 11/Spring Boot APIs and managed 100+ microservices on GCP/Kubernetes during an in-house transition.
- Owned GKE clusters, IAM, Secret Manager, Cloud SQL, CI/CD, production incident coordination, and delivery of the public Svensk Galopp data API.

COMBITECH AB
Software Consultant

August 2016 – June 2020
Stockholm

- **Ericsson:** Built Java 11/Spring Boot microservices for a Guided Sales platform capable of configuring billions of LTE/5G radio access network combinations.
- **Inera:** Led a Java 11 data migration of 750,000 ISO-classified assistive devices to Sweden's national ordering platform, enabling an on-schedule launch.
- **Saab:** Architected and built a greenfield Java 8 reactive subsystem for a naval combat-management platform.
- **Pierce Group:** Improved product-data loading performance by 120x and authored 125 API load tests.
- Represented Combitech at university recruitment events, including KTH's THS Armada.

SAAB AB
Technical Design Authority (promoted from Software Engineer)

November 2012 – August 2016
Stockholm

- Led development of the EWLib platform for air, land, and sea defence systems.
- Served as forward-deployed engineer and sole Saab representative for a major client system up-grade.
- Conducted technical interviews for engineering hires.

Earlier Experience

- **Academic Work AB** — Software Consultant 2012
- **Innventia Edge** — Software Engineer 2011–2012

OPEN SOURCE

clem — *Secure Multi-Agent Orchestration Platform* github.com/jahwag/clem
Open-source Go/MCP platform for running and coordinating coding-agent teams on Linux across local and cloud model runtimes.

CtxSync — *Claude.ai CLI & File Synchronization* github.com/jahwag/ctxsync
Open-source Python tool for bidirectional synchronization between local development environments and Claude.ai projects; **700+ GitHub stars**.

EDUCATION & CERTIFICATION

KTH Royal Institute of Technology — *B.Sc. studies in ICT, 177 ECTS completed* 2007–2011

Professional Scrum Master I — Scrum.org 2025

Software Craftsmanship — Combitech Grow 2019

Agile Architecture Fundamentals — Informator AB 2019

Effective Coding Principles & Patterns in Java — Informator AB 2017

C2 Proficiency (CPE) — Cambridge Assessment 2006
