JAHZIAH WAGNER

Senior Software Engineer | AI Solutions Architect

Stockholm, Sweden · +46 (0)760-335 220
jahziah@bytelope.com · bytelope.com · LinkedIn

PROFESSIONAL SUMMARY

Senior software engineer and AI solutions architect with 15 years delivering production systems across payments, digital identity, AI and cloud platforms. Hands-on with PKI and signing (X.509 chains and trust lists, PAdES, PKCS#11 HSM) and audit logging in regulated systems; owns a shared AI gateway at Strawberry.

CORE SKILLS

Backend & Web: Java 21, Kotlin, Spring Boot, Quarkus, Python, Go, TypeScript, React, Vue.js, REST
AI & Platforms: LiteLLM, AWS Bedrock, MCP, Spring AI, LangChain4j, Elasticsearch
Cloud & Operations: AWS/EKS, GCP/GKE, Kubernetes, Docker, CI/CD, observability, incident response
Security & PKI: X.509, TLS, PAdES, PKCS#11/HSM, Bouncy Castle, Nimbus JOSE, eIDAS 2.0, OpenID4VCI/VP, OAuth 2.0/OIDC, BankID
Testing & Languages: JUnit, Mockito; Swedish (native), English (C2)

PROFESSIONAL EXPERIENCE

STRAWBERRY February 2026 – Present
Principal AI Engineer (via Bytelope AB) *Stockholm*

- Lead AI architecture and enablement for a 14-developer product team; delivered eight AI training courses covering AI coding, MCP/tool calling, security and local LLMs.
- Proposed, deployed and maintained the shared LiteLLM gateway: budgets/quotas, model access, routing/fallbacks and monitoring. Central AI platform adoption grew from 0 to 34 users.
- Built a support-agent pilot integrating Freshservice tickets with BookStack knowledge, using tool-based retrieval, validated citations and controlled actions; demonstrated it to the IT leadership team.
- Defined AI governance covering EU data residency, DPAs, no-training guarantees, model evaluation and cost controls.
- **Technologies:** Java 21, Python, TypeScript, AWS Bedrock/EKS, MCP, Spring AI, LangChain4j.

BYTELOPE AB April 2021 – Present
Founder / Consultant *Stockholm*

- Independent AI and software consulting; builds retrieval and developer tools. Member of the Anthropic Claude Partner Network.

SWEDISH AGENCY FOR DIGITAL GOVERNMENT (DIGG) September 2024 – October 2025
Senior Software Engineer / Scrum Master (via Bytelope AB) *Stockholm*

- Core engineer on the 15-person team building Sweden's EU Digital Identity Wallet under eIDAS 2.0 and OpenID4VCI/VP; onboarded five engineers.
- Led a six-person team delivering a PAdES Digital Signature Service; implemented React frontend features on the separate private e-signature project.
- X.509 certificate handling for PAdES signing and validation (chains, trust lists, signing certificates); PKCS#11 signing keys tested against SoftHSM2; audit logging.
- **Technologies:** Java 21, Kotlin, Quarkus, PostgreSQL, Bouncy Castle, Nimbus JOSE, OAuth 2.0, BankID; React (signatures), Vue.js (wallet).

KINDRED GROUP August 2021 – January 2024
Senior Software Engineer (via Bytelope AB) *Stockholm*

- Owned and modernized 10 Java 21/Spring Boot payment integrations for 3M+ active customers under KYC/AML requirements; managed production escalations as rotating Incident Manager.
- Implemented Swish certificate handling (request signing, certificate loading) and audit logging for payment flows.
- Created shared Spring Security, WebFlux and JPA/Hibernate templates and standards. Made occasional React frontend changes alongside backend delivery; onboarded nine engineers.
- **Technologies:** Java 21, Spring Boot, React, TypeScript, Kubernetes, Oracle, Splunk, Grafana.

BYTELOPE AB

EARLIER EXPERIENCE

SVENSK TRAVSPORT AB June 2020 – March 2021
Lead Software Engineer *Stockholm*

- Led nine distributed engineers building Java 11/Spring Boot APIs and managed 100+ microservices on GCP/Kubernetes during an in-house transition.
- Owned GKE (incl. TLS certificates), IAM, Secret Manager, Cloud SQL, CI/CD, incident coordination and delivery of the public Svensk Galopp data API.

COMBITECH AB August 2016 – June 2020
Software Consultant *Stockholm*

- **Inera:** Led migration of 750,000 ISO-classified assistive devices using Java 11, enabling an on-schedule launch.
- **Pierce Group:** Improved product-data loading performance by 120x using Elasticsearch; authored 125 API load tests.
- **Ericsson:** Java 11/Spring Boot microservices for LTE/5G configuration. **Saab:** Greenfield Java 8 reactive naval subsystem.

SAAB AB November 2012 – August 2016
Technical Design Authority (promoted from Software Engineer) *Stockholm*

- Led development of the EWLib defence platform, including audit logging; forward-deployed engineer and sole Saab representative for a major client system upgrade.

Earlier: Academic Work AB — Software Consultant (2012); Innventia Edge — Software Engineer (2011–2012).

SELECTED PROJECTS

consultant.dev — Built a production consultant search/matching platform with TypeScript, Cloudflare, Elasticsearch and a Nuxt/Vue frontend. consultant.dev

CtxSync — Open-source Python tool synchronizing local development environments and Claude.ai projects; **700+ GitHub stars**. GitHub: ctxsync

EDUCATION & CERTIFICATION

KTH Royal Institute of Technology — B.Sc. studies in ICT, 177 ECTS completed 2007–2011

Professional Scrum Master I — Scrum.org (2025)

Software Craftsmanship — Combitech Grow (2019); Agile Architecture Fundamentals — Informator AB (2019); Effective Coding Principles & Patterns in Java — Informator AB (2017); C2 Proficiency (CPE) — Cambridge Assessment (2006)
